- Past Activities

Reduction of Environmental Load / GHG Emission Reduction (Scope3)

At present, most Scope 3 GHG emissions are only measured in Japan. By 2023, we will extend measurements to the whole Group while also improve their accuracy, seeking to identify categories that account for two-thirds of all Scope 3 emissions. We will also deepen the dialogue with business partners and set Scope 3 reduction targets for the entire supply chain.

We aim to obtain Science Based Targets (SBT)* certification for our Scope 1 and 2 as well as Scope 3 GHG emission reduction targets.

※ SBT (Science Based Targets) Voluntary targets set by business corporations with regards to GHG emission reductions over the course of 5 to 15 years in a manner consistent with the levels required by the Paris Agreement
