Materiality

Materiality Specific Procedure

Materiality

The Kuraray Group identifies material issues related to us as materiality. The Kuraray Group reviewed its materiality in 2019, for five domains along with specific examples: “improving the natural environment,” “improving the living environment,” “effective use of resources and reduction of environmental impact,” “improving supply chain management,” and “building a ‘company that people can take pride in’.” Contributions to these revised material domains are being incorporated into the business plans of all Group organizations.

Materiality of the Kuraray Group

Creating Value through Business

Improving the natural environment	Improving the living environment
<ul style="list-style-type: none"> - Climate change measures—GHG reduction and energy conservation - Solution of marine plastics and plastic waste - Water and air purification - Biodiversity conservation - Development of next-generation applications, products, and technologies - Circular Economy 	<ul style="list-style-type: none"> - Contribute to the safe and reliable supply of food and water - Improvement of quality of life - Promotion of health and wellness for all - Development of next-generation applications, products, and technologies
  	  
	

Creating Value to Strengthen the Foundation of Kuraray

Effective use of resources and reduction of environmental impact	Improving supply chain management	Building a “company that people can take pride in”
<ul style="list-style-type: none"> - Reduction of GHG emissions - Reduction of chemical emissions - Reduction of waste volume and intensity - Reduction of marine plastics and plastic waste 	<ul style="list-style-type: none"> - Sustainability Procurement - Improvement of product stewardship 	<ul style="list-style-type: none"> - Promotion of safety activities - Improvement of safety and disaster prevention preparedness - Enhancement of technology and working smarter - Promotion of workplace diversity and inclusion
     		
		

Linking Materiality with SDGs

In line with the review of materiality, material issues that the Kuraray Group should address have been identified from the terms of the SDGs, as shown below in “Procedure to identify materiality.”

Each material issue has been linked with the SDGs to clarify the relationship. This allows the Group's sustainability activities to not only address the Group's material issues but also contribute to achieving the target of the SDGs.

Creating Value through Business

Improving the natural environment	Improving the living environment
<p>6  6.3 By 2030, improve water quality by reducing pollution, eliminating dumping and minimizing release of hazardous chemicals and materials, halving the proportion of untreated wastewater and substantially increasing recycling and safe reuse globally</p> <p>13  13.3 Improve education, awareness-raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning</p> <p>14  14.1 By 2025, prevent and significantly reduce marine pollution of all kinds, in particular from land-based activities, including marine debris and nutrient pollution</p>	<p>3  3.8 Achieve universal health coverage, including financial risk protection, access to quality essential health-care services and access to safe, effective, quality and affordable essential medicines and vaccines for all</p> <p>6  6.a By 2030, expand international cooperation and capacity-building support to developing countries in water- and sanitation-related activities and programmes, including water harvesting, desalination, water efficiency, wastewater treatment, recycling and reuse technologies</p> <p>12  12.3 By 2030, halve per capita global food waste at the retail and consumer levels and reduce food losses along production and supply chains, including post-harvest losses</p>
<p>17  17.16 Enhance the Global Partnership for Sustainable Development, complemented by multi-stakeholder partnerships that mobilize and share knowledge, expertise, technology and financial resources, to support the achievement of the Sustainable Development Goals in all countries, in particular developing countries</p>	<p>17  17.17 Encourage and promote effective public, public-private and civil society partnerships, building on the experience and resourcing strategies of partnerships</p>

Creating Value to Strengthen the Foundation of Kuraray

Effective use of resources and reduction of environmental impact	Improving supply chain management
